

Capability Matrix

Purpose

This document maps professional capabilities to the evidence contained within the Gildmark portfolio.

Unlike the Evidence Register, which catalogs individual artifacts, the Capability Matrix organizes those artifacts by the capabilities they demonstrate.

Its purpose is to provide multiple perspectives over the same body of evidence.

Depending on context, the same capability may support a résumé bullet, an interview response, an architectural essay, a consulting discussion, or an executive briefing.

Every capability listed below should be supported by one or more concrete artifacts contained within the Evidence Register.

Capability Matrix

Capability	Supporting Artifacts	Portfolio Sections	Assessment
Enterprise Architecture	High-Level Build Plan; Architectural Decision Register; Architecture Thesis	Engineering Process; Architecture Thesis	Exceptional
Systems Thinking	High-Level Build Plan; Domain Intelligence Sessions; Representative Services	Engineering Process; Representative Services	Exceptional
Architectural Governance	Architectural Decision Register; Engineering Handoff; Technical Debt Register	Engineering Process	Exceptional
Domain Modeling	Domain Intelligence Sessions; Representative Services	Representative Services	Exceptional
API-First Design	Endpoint Inventory; Service Contracts	System Architecture	Exceptional
Platform Architecture	Endpoint Inventory; Architecture Thesis; Representative Services	System Architecture	Exceptional
Technical Leadership	High-Level Build Plan; Engineering Handoff; Architectural Decision Register	Engineering Process	Strong

Capability	Supporting Artifacts	Portfolio Sections	Assessment
Engineering Discipline	Engineering Handoff; Technical Debt Register; Testing Strategy	Engineering Process	Exceptional
AI-Assisted Engineering	CLAUDE.md; AI Collaboration Methodology	AI Collaboration	Exceptional
Product Strategy	Platform Positioning; Architecture Thesis	Architecture Thesis	Strong
Technical Communication	Portfolio Overview; Architectural Essays	Executive Summary; Essays	Developing
Executive Communication	Portfolio Overview; Executive Summary	Executive Summary	Developing
Consulting Readiness	Portfolio Overview; Architecture Thesis; Representative Services	Executive Summary; Representative Services	Strong
Strategic Planning	High-Level Build Plan; Platform Backlog	Engineering Process	Exceptional

Portfolio Coverage

The Capability Matrix provides a high-level assessment of portfolio coverage.

Capabilities assessed as **Exceptional** are considered distinguishing strengths and should appear prominently in résumé material and interview discussions.

Capabilities assessed as **Strong** are well supported but may benefit from additional narrative or representative examples.

Capabilities assessed as **Developing** indicate areas where additional portfolio artifacts are planned to improve communication rather than technical depth.

As the portfolio evolves, this matrix should be reviewed whenever a significant new artifact is added or an existing capability is strengthened.

Governance

The Capability Matrix is a derived document.

It should never become the source of truth.

New artifacts should first be evaluated and entered into the Evidence Register.

Only after evidence has been cataloged should this matrix be updated to reflect the additional capabilities that the evidence supports.

This preserves traceability between claims and supporting artifacts while ensuring that every capability presented by the portfolio remains grounded in demonstrable evidence.
